

CONDITIONS OF SALES

The cylinder(s) mentioned on this invoice is (are) the property of Les Gaz Industriels Ltd and cannot be sold, loaned or transferred to another producer or user. In case the CUSTOMER cannot return the cylinder to LES GAZ INDUSTRIELS LTD., an amount equivalent to the Net Replacement Value of the cylinder in question (plus any other related costs) will be claimed.

THE CUSTOMER:

- (1) must keep the cylinder(s) in a suitable and safe place at his premises.
- (2) is responsible for the handling of the cylinder(s) under his custody and hereby indemnifies LES GAZ INDUSTRIELS LTD. against any claim, injury or damage that may be caused by the cylinder(s) for whatever reason.
- (3) Will be charged the value of the cylinder(s) in case the cylinder(s) is (are) damaged while under his custody and condemned for further use. (Please note that such cylinder must be returned to LES GAZ INDUSTRIELS LTD. for destruction.)
- (4) must, after the gas has been used, return the empty cylinder(s) in the same condition as received and must not alter, remove or tamper with any marks, labels or numbers on the cylinder(s) supplied to him by LES GAZ INDUSTRIELS LTD. The costs of repairing/refurbishing cylinders damaged while under the customer's custody will be claimed accordingly.

LES GAZ INDUSTRIELS LTD.:

- (1) Is bound to service the CUSTOMER as per the contract signed with the CUSTOMER.
- (2) Reserves the right. For safety reasons, to have at any time cylinder(s) returned for inspection and thereafter to take corrective actions that may be deemed necessary.

SAFETY INSTRUCTIONS

- DO NOT** use oil or grease for lubricating cylinder valves gauges, regulators or other fittings, as oil or grease may ignite violently in the presence of oxygen.
- DO NOT** smoke or use any naked light in the vicinity of cylinder storage as an explosion may occur.
- DO NOT** use cylinders as roller bed for moving heavy articles
- DO NOT** expose any cylinder to fire or excessive high temperature as the pressure exerted by the heated gas may increase to the extent of bursting the valve of the cylinder and cause considerable harm to the surroundings.
- DO NOT** leave uninstructed or unqualified employees work with medical gases as they may use them incorrectly and be the cause of fatal accidents.
